

# Tchami - Essential Mix

## [Future House Set]

What day is it?

**HUMP DAYYYYY**

Tchami just released an essential mix that's everything your hump day could ever want and need. Future house has been out of its bubble of bandwagon hype lately, and honestly, I've been hearing less and less of it at festivals & shows. Which is sad, because this genre is oh so fun to bounce around too and shuffle.

Hit play & get ready for two hours of funky grooves and booty moves. Tchami knows how to make you move. That's a bloody fact.

So no matter what you're doing today. Work. School. Marathon. Pig Wrestling. This is mix will set that vibe and keep it right. Recommended with some decent headphones or speakers so that you can feel the bass lines in your toe nails. Trust me. You'll thank me later.

Also. If you're wrestling a pig. Call me. I've always wanted to try that.
